After a problem is identified, the scientist would typically conduct some research about the problem and then make a hypothesis about what will happen during his or her experiment. A better explanation of the purpose of a hypothesis is that a hypothesis is a proposed solution to a problem.

Hypothesis Examples - Softschools.com

The ocean and some lakes are salty, and this salt comes from the rocks in the water. You can't see the salt in the water because it is dissolved, but it has a big impact on the creatures that can live in an environment. The amount (or concentration) of salt in the water is called salinity. Brine ...
