This is an introductory book on African legal philosophy. The book claims that African legal philosophy exists and is intelligible in the context of African culture, just as every other legal philosophy has its cultural foundation. Thinking About Clinical Legal

Education provides a range of philosophical and theoretical frameworks that can serve to

enrich the teaching and practice of Clinical Legal Education (CLE).

CLE has become an increasingly common feature of the curriculum in law schools across the globe.

However, there has been relatively little attention paid to the theoretical and philosophical dimensions of this approach. This edited collection seeks to address this gap by bringing together contributions from the clinical community, to analyse their CLE practice using the framework of a clearly articulated philosophical or theoretical approach.

Contributions include insights from a range of jurisdictions
