The Catalan numbers have an integral representation = $\sum_{k=0}^{n-1} \binom{n-1}{k} \binom{n}{k+1}$, where $\binom{n}{k} = \frac{n!}{k!(n-k)!}$. This means that the Catalan numbers are a solution of a version of the Hausdorff moment problem. Applications in combinatorics

Recurrence Relation; Generating Function. A useful tool in proofs involving the Catalan numbers is the recurrence relation that describes them. The Catalan numbers satisfy the recurrence relation. $C_{n+1} = C_0 C_n + C_1 C_{n-1} + \dots + C_n C_0 = \sum_{k=0}^n C_k C_{n-k}$.

Catalan Numbers - MIT Mathematics

Catalan numbers is a number sequence, which is found useful in a number of combinatorial problems, often involving recursively-defined objects. This sequence was named after the Belgian mathematician Catalan, who lived in the 19th century. (In fact it was known before to Euler, who lived a century before Catalan).
