Elementary School Mathematics Priorities

The article sets out the five building blocks of elementary mathematics: numbers, the place value system, whole number operations, fractions and decimals, and problem solving. It stresses the need for precision otherwise ambiguity creeps in and we are no longer dealing with mathematics.

ERIC - EJ838661 - Elementary School Mathematics Priorities ...

the starting point for mathematics education should reflect what is conceptually fundamental or basic in the structure of mathematics. That is, since children instinctively make sense of their world in a way that is inherent to mathematics, school instruction of mathematics should build from such everyday concepts. For example, as children interact with

ADDRESSING PRIORITIES FOR ELEMENTARY SCHOOL MATHEMATICS

In "Elementary School Mathematics Priorities," Wilson (2009 [this issue]) presents a list of five core concepts that students should master in elementary school so that they can succeed in algebra. As researchers in mathematics education, the authors enthusiastically endorse Wilson's recommendations.
