The Reconstruction Era and The Fragility of Democracy uses our pedagogical approach to help students examine how a society rebuilds after extraordinary division and trauma, when the ideals of democracy are most vulnerable. The unit presents educators with materials they need to engage students in a deep study of the pivotal era of American history that followed the Civil War. It provides history teachers with dozens of primary and secondary source documents, close reading exercises, lesson plans, and activity suggestions that will push students both to build a complex understanding of the dilemmas and conflicts Americans faced during Reconstruction and to identify the legacies of this history that extended through the 20th century to the present day. These materials will help students examine closely themes such as historical memory, justice, and civic participation in a democracy. The unit includes a variety of interdisciplinary teaching strategies that reinforce historical and literacy skills."

"This book contains a collection of papers prepared at a World Bank conference held in June 1994 on privatization and private sector development in Russia. It reviews the privatization achievements of Russian reformers over the past three years, discusses emerging second-tier privatization and post-privatization issues, and summarizes the key themes in the papers presented at the conference. Between November 1991 and June 1994: 1) between 12,000 and 14,000 medium-size and large enterprises had been transferred to private ownership; 2) this set of firms employed more than fourteen million people, or about half of those employed in Russia's industrial sector; 3) about forty million Russian citizens owned shares in privatized firms or investment funds. Although the Russian privatization program has achieved impressive results, the transfer of ownership (mainly to insiders) is only a first step. This must be followed by equally essential second steps to facilitate ownership of privatized firms to external, core investors who will bring in much needed capital, managerial know-how, and access to global markets." -- Website.
