[citation needed] Before construction began the engineers had to assess the spring and whether it could provide for all of the city's anticipated citizens. After evaluating the water supply, the civil engineers designed a 2,457-foot (749 m)-long canal to what would become the city's center. The canal descends the mountain slope, enters the ...

A scorched-earth policy is a military strategy that aims to destroy anything that might be useful to the enemy. Any assets that could be used by the enemy may be targeted, which usually includes obvious weapons, transport vehicles, communication sites, and industrial resources. However, anything useful to the advancing enemy may be targeted, including food stores and agricultural areas, water ...
