running on opposite sides of each cylinder, which matches a design in a separate patent we uncovered last August. Both patents were originally filed with the U.S. Patent and Trademark Office in early 2019, with Harley-Davidson engineer Johann Voges as the only credited inventor, making it likely they're for the same engine.

this year. Harley-Davidson may be getting ready for its future models with new technology. And this time, it's for a new v-twin engine which will use variable valve timing (VVT), as well as a modular engine balancer. Latest patent images show how that the new v-twin engine will be different from existing Harley-Davidson engines, and how the VVT system works in tandem with the modular balancer.
