Regardless of its origins, the timing belt set up is the same as the 2.7 engine fitted in the Land Rovers. This engine runs a timing belt that requires replacement every 100,000Kms. In fact this engine actually has two belts. The first is the main timing belt that keeps the cam and crank shafts in synchronization with each other.

Changing your engine's oil is probably the best engine insurance you can buy. But you need to do it properly, so a workshop manual is probably a good thing to have as well as it should walk your through the process (important the first time). You also need to be able to dispose of the old oil and filter in an environmentally responsible way, too.

A basic service includes engine oil and engine oil filter change, as well as a general safety inspection and inspection of all fluids. If minor quantities of other fluids are required, the mechanic will top these up. A logbook service is a series of scheduled tasks recommended by the vehicle manufacturer at certain time intervals.
