Morgan J. Hurley Richard W. Bukowski A available methods to estimate the potential impact of fire can be divided into two categories: risk-based and hazard-based. Both types of methods estimate the potential consequences of possible events. Risk-based methods also analyze the likelihood of scenarios occurring, whereas hazard-based methods do not.

The Purpose of FEA Analytical Solution • Stress analysis for trusses, beams, and other simple structures are carried out based on dramatic simplification and idealization: - mass concentrated at the center of gravity - beam simplified as a line segment (same cross-section) • Design is based on the calculation results of the idealized structure & a large safety factor (1.5-3) given by ...

Assessment Criteria. Forages are identified by morphological characteristics in behavioral observation and microhistology, whereas the chemical properties of samples are used to reconstruct diets in stable isotope analysis, NIRS, cuticular wax alkanes, and DNA barcoding (see Fig. 1). We separately evaluated each technique against five criteria: cost, precision, resolution, timescale, and diet type.
