The average LCD or DLP lamp lasts for about 8,000 hours, which equals about five hours of viewing time per day for four years straight. While that's fewer hours than the 50,000 to 100,000 hours promised by a plasma set, it's important to remember that once burned out, plasma lamps cannot be replaced and the TV is rendered useless, whereas a burned lamp is a completely fixable issue in LCD and ...

What Happens to a TV Lamp When It's Burnt Out? | Techwalla

What can prevent a DLP TV from turning on and the light to blink 9-10 times? This could be bad capacitors on several boards inside the chassis. As seen above, DLP televisions may be an older technology but are still popularly used. Troubleshooting their problems throws light on the need to replace faulty parts. This can prove to be expensive.
