Incorporating a robust and thorough commissioning process such as ours in a development project is recognised as best practice worldwide.

What is Commissioning and Testing?

Upon completion of static testing, dynamic testing can be undertaken, this is 'commissioning'.

Commissioning is carried out to prove that the systems operate and perform to the design intent and specification. This work is extensive and normally commences by issuing a certificate permitting the installation to be made

Testing and commissioning precautions. This article continues the series of articles dedicated to erection, testing and commissioning of MV/HV switchgears by describing the most important precautions and recommendations in various procedures and steps. Starting from the wiring of low voltage command and signal cables, filling CBs with SF6 gas, special attention is given to testing and commissioning checks (visual, mechanical, electrical, operational and insulation resistance).

ERTMS: from test and commissioning to operations and maintenance. EU ERTMS Coordinator Matthias Ruete recently said in his first ERTMS Work Plan that the industry is 'at a critical point for ERTMS deployment in Europe and globally. With strong support from EU Member States, deployment, both trackside and onboard, has to be accelerated so that we can equip the entire European rail network by 2030.'
