The formulas particular to trigonometry have: sin (sine), cos (cosine), and tan (tangent), although only sin is represented here. [Special Right Triangles](#) Every right triangle has the property that the sum of the squares of the two legs is equal to the square of the hypotenuse (the longest side).

[Trigonometry](#) (from Greek trigōnon, "triangle" and metron, "measure") is a branch of mathematics that studies relationships between side lengths and angles of triangles. The field emerged in the Hellenistic world during the 3rd century BC from applications of geometry to astronomical studies.

If the two legs are longer than necessary to satisfy the Pythagorean Theorem, then the included angle must be less than 90° in order to make the triangle. Therefore, the triangle is acute. [Chapter 1 - Introduction to Trigonometry](#)[Answer Key](#)

[Solution](#) : Now we need to find the height of the side AB. $\sin \theta = \frac{\text{Opposite side}}{\text{Hypotenuse side}}$. $\sin 60^\circ = \frac{AB}{100}$. $\frac{\sqrt{3}}{2} = \frac{AB}{100}$. $(\frac{\sqrt{3}}{2}) \times 100 = AB$. $AB = 50 \sqrt{3}$ m. So, the height of kite from the ground $50 \sqrt{3}$ m.

What is trigonometry? [Trigonometry](#) is a branch of mathematics. The word itself comes from the Greek trigōnon (which means "triangle") and metron ("measure"). As the name suggests, trigonometry deals mostly with angles and triangles; in particular, it's defining and using the relationships and ratios between angles and sides in triangles. The primary application is thus solving triangles, specifically right triangles, but also any other type of triangle you like.

[Trigonometry Calculator](#). Simple way to find sin, cos, tan, cot

$\tan = \frac{\sin}{\cos} = \frac{1}{\cot}$. $\sin = \frac{\tan}{\sec}$ / $\sec = \frac{1}{\cos}$ if you put it simply it implies that sin equals divided cosec. $\csc = \frac{1}{\sin} = \cot/\cos$. As with any other subject, it's all about practice, so make sure to spend even as little as 30 minutes every day solving trigonometry problems if you want to master this subject.
