## **Tuning Weber Carbs.**

Selection and tuning of Weber DCOE carburetors. A very popular modification for kit car owners is the fitment of twin Weber DCOE or DCO/SP carburetors; these not only deliver the goods but also look very good. A good deal of mystique surrounds Webers, specifically Weber jetting and tuning. However Weber DCO series carbs are not as complicated as you might imagine, and whereas there is no substitute for a good rolling road session to tune them, there is much you can do to tune them yourself ...

## **Selection and tuning of Weber DCOE Carburetors**

Tuning the idle is perhaps the simplest task in tuning Weber IDAs, but even the simplest task can get complicated. The first step is to make sure that the carbs are synchronized. This is discussed in a separate section. The next step is to establish "lean best idle". This can fairly easily be done by ear, though it may take some practice.

Technical Docs. have your say. 1. Begin by insuring that for initial carburetor set up all the air by-pass screws should be in closed position. These are not normally used in standard carburetor adjustment. Note to do this, loosen the pinch nut, then turn the screw all the way in until seated, then re-secure the pinch nut. 2.
