Zenith Clock Radio Manual

Consult the manual for the clock before turning it on. There may be a set procedure which if not followed, will result in the radio controlled clock not working; If the clock uses both mains power and a battery, remember to switch on the mains power and allow the clock to set before inserting the battery.

Radio-controlled clock showing incorrect time - NPL

The analyzers operate on high frequency and very high frequency amateur radio bands. The high frequency bands are just above the AM bands, and range from 3 to 30 MHz. The very high frequency bands have a range of 30 MHz to 300 MHz. The very high frequency bands are at the low end of practical use for amateur radio enthusiasts.

Broadcast radio receivers. The most familiar form of radio receiver is a broadcast receiver, often just called a radio, which receives audio programs intended for public reception transmitted by local radio stations. The sound is reproduced either by a loudspeaker in the radio or an earphone which plugs into a jack on the radio. The radio requires electric power, provided either by batteries ...

Dumont RA346 Clock Radio (1956) (Wood tube clock radio) For those with an eclectic flare in radios I have the absolute livin' end! From '56 and the mad scientists at DuMont Labs - less the tail fins - comes this clock radio that demands attention and probably gets it most of the time! Gingerbread works, too! It plays really good as does the clock.
