In Zoom, Bob Berman explores how motion shapes every aspect of the universe, literally from the ground up. With an entertaining style and a gift for distilling the wondrous, Berman spans astronomy, geology, biology, meteorology, and the history of science, uncovering how clouds stay aloft, how the Earth's rotation curves a home run's flight, and why a mosquito's familiar whine resembles a telephone's dial tone.

Amazon.com: Zoom: How Everything Moves: From Atoms and ...

Zoom is a book about how everything moves-- in a way you would least expect it to! Everything is moving, and not just that rabbit in your garden! The atoms in your body are jiggling furiously, and even the planet itself is orbiting at thirty five times the speed of sound.
